

Pump Sampler

Highly effective hand operated sample pump

Allows quick sampling of liquids. The chance of cross contamination is greatly reduced by using new tube and bottles for each sample.

- Suitability: Low to medium viscosity liquids.
- Type: Single Point
- Material: PE, PTFE or 316L stainless steel
- Operation:
1. Cut the sampling tube to the required length.
 2. Screw the collecting bottle to the base of the hand pump.
 3. Insert one end of the sampling tube through the hand pump and into the collecting bottle.
 4. Drop the other end of the sampling tube into the product. At the required depth pump the handle. Several pumps will fill the sample collecting bottle.

Pump Efficiency

The Pump Sampler is highly efficient and is able to pump water to a height of about 4m

The pump is not a product contact part. Only the tube and collecting bottle come into contact with the product

Use Your Current Sample Collection Bottles

Special PTFE adapters can be made to allow bottles with different neck sizes and thread patterns to be used with the Pump Sampler.

These adapters are suitable for use with either the plastic or stainless steel pump sampler (state your pump type at the time of ordering).

When ordering please post us one of your bottles.
